

# NCR MediKiosk™

Want to offer your patients a simpler,  
faster and more accurate way to check in?

YES

## NCR MediKiosk streamlines the patient registration process

The NCR MediKiosk self-service patient check-in solution integrates with your practice management systems, making check in and out more convenient for patients and more efficient for your enterprise.

- **Boost patient satisfaction**

Putting your patients in control enhances privacy and safe delivery of care through positive patient identification. NCR MediKiosk also allows patients to verify registration information, make co-payments, sign HIPAA and consent forms, complete medical history questionnaires and find their way around your facility.

- **Improve revenue cycle management**

Patients can settle co-pays and outstanding balances at the kiosk by swiping their credit card. This ability to collect payments upon check-in improves cash flow while more accurate data also results in fewer denied claims, further streamlining revenue cycle management.

- **Reduce wait times**

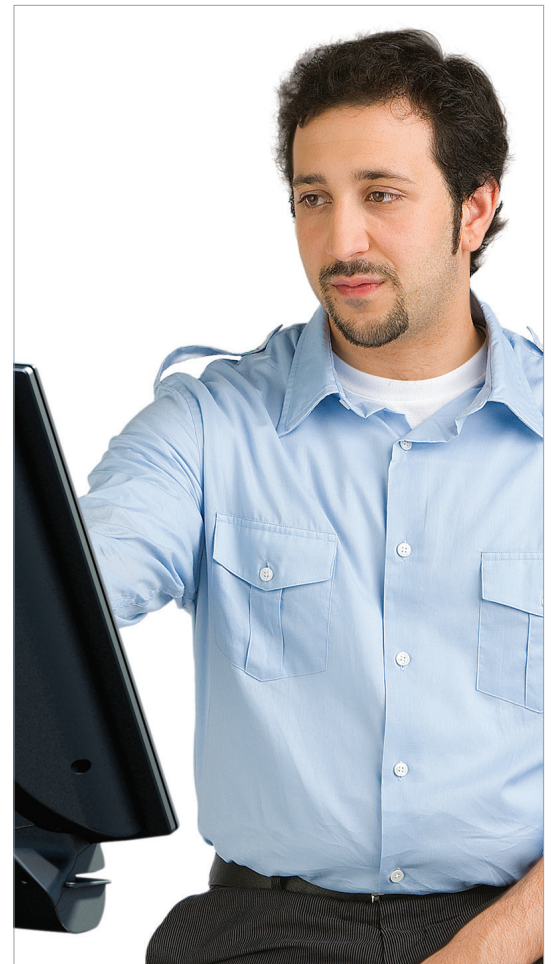

No one likes to wait. An NCR study found consumers rank the process of registering at a hospital or clinic among the third most frustrating waits behind renewing a driver's license or checking out at a store. NCR MediKiosk shortens wait times by as much as 50% for new patients and 75% for existing patients.

- **Increase efficiency**

Automating the check-in process minimizes congestion at the front desk, reduces duplicate data entry and saves time previously spent manually checking in patients. Staff can focus on providing more personalized patient assistance.

- **Create a multichannel experience**

Built upon the NCR Enterprise Server platform, enabling a converged patient experience across kiosk, mobile tablet and web channels and allowing organizations to make changes to forms and workflows.

## Key Features

- Integrates with practice management systems
- Supports more consistent collection of outstanding balances; captures signatures for consent/HIPAA forms, insurance cards and other documentation
- Features a Fujitsu Palm Vein Scanner with infrared sensor for accurate biometric authentication
- Available in English or Spanish
- Supports multichannel patient experience and on-demand workflow changes

## Why NCR?

With over 125 years of experience, NCR is a leading global provider of assisted- and self-service solutions. We help our healthcare clients around the world improve their patient interactions, implement change quickly and proactively, and transform their organizations to become leaders and change agents. We can help you, too.

## Technical Specifications

### DISPLAY

- High Brightness Resistive LCD (17/19")  
Integrated stereo speakers

### MOTHERBOARD

- Mobile Intel® GM 45 Express Chipset
- Scalable Mobile Processors
- Intel® Core™ 2 Duo T7500  
- Intel® Celeron® 575
- Two SODIMM Sockets Supporting 667 – 800 MHz DDR2 Memory
- Modules  
- 1GB – 8GB  
- Dual Channel Support
- Intel Cantiga GM Chipset  
- Intel Cantiga GM Graphics Memory Controller Hub (GMCH)  
- Intel ICH9M I/O Controller Hub
- AMT  
- Full support for Intel AMT 4.0 including out of band functions
- LAN  
- Intel 82567 Platform LAN connect with 10/100/1000 Ethernet support LAN
- BIOS Hardware Support  
- BIOS resident in the 32MB SPI Flash device  
- Support for ACPI, SMBIOS
- Security  
- TPM 1.2 module integrated into ICH9M in chipset

### OPERATING SYSTEM

- Windows XP Professional

### CONNECTIVITY

- Serial ATA (SATA) Hard Drive Interface
- High-speed Gigabit Ethernet
- Intel AMT 4.0 Remote Management
- Two Powered RJ-45 Serial Ports (I/O Board)
- Six Type A USB Connectors (I/O Board)
- Line Out for Audio (ADA Connection for kiosk applications)
- Speed Controlled CPU Fan
- Integrated Signage System
- Power Supply  
- 19 V, 7.9 A External Power Brick  
- 150W Output Power  
- IEC 320 C6 Type AC inlet (3-prong mini IEC)

### OPTIONS

- 3-Track USB MSR (ISO)
- Flush Wall Mount
- Table Top Mount/Stand
- Fixed Angle Mount w/Power Supply Enclosure
- Omnidirectional 1D/2D Bar Code Scanner
